

RICARDO TORRES MORENO

El Paso, TX | rtorresmoreno@miners.utep.edu | linkedin.com/in/rtmo | github.com/ricardotm-dev | ricardotm-presentation.vercel.app

EDUCATION

Bachelor of Science in Computer Science

The University of Texas at El Paso

Expected May 2028

GPA: 3.92/4.0

- **Dean's List:** Fall 2024, Spring 2025
- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Automata Theory, Database Management Systems, Matrix Algebra, Calculus II

TECHNICAL SKILLS

Languages: Python, C, JavaScript, Bash/Shell, SQL, HTML/CSS

Frameworks & Libraries: React, Node.js, NumPy, Pandas, asyncio

Developer Tools & Infrastructure: Linux (Arch, Debian), Docker, Git, Vercel, Cloudflare Tunnel, Tailscale, systemd, Extron Global Configurator Pro

EXPERIENCE

Undergraduate Assistant – GAIA Makerspace & Tech Support

Learning Environments, College of Engineering

February 2026 – Present

El Paso, TX

- Resolved **30+** hardware tickets monthly (3D printers, laser engravers) across GAIA Makerspace facilities, maintaining an average turnaround time under **20 minutes** per issue
- Configured, deployed, and maintained campus AV systems (Extron IN1808/IN1804) via Global Configurator Pro, diagnosing and resolving issues on **2+** systems weekly across **300+** campus classrooms

Undergraduate Assistant

UTEP Department of Computer Science

September 2024 – January 2026

El Paso, TX

- Performed system updates, virus scans, and diagnostics on **150+** departmental computers, cutting malware incidents by **20%**
- Diagnosed and resolved **80+** technical support tickets spanning hardware and software issues, maintaining an average resolution time under **20 minutes**
- Managed IT asset inventory of **600+** devices (laptops, monitors, and peripherals), conducting audits that increased record accuracy by **19%**

PROJECTS

Sonicberry – Self-Hosted Media Ecosystem | Docker, Cloudflare, Tailscale, Python

June 2026 – Present

- Containerized **2** backend services with **Docker Compose** and deployed a **systemd**-managed Telegram bot, achieving zero unplanned restarts across the full stack
- Secured the streaming platform by routing public traffic through Cloudflare Tunnel for edge DDoS/TLS termination and isolating SSH management over a Tailscale (WireGuard) VPN, eliminating direct port exposure.
- Engineered a Python Telegram bot (**asyncio**) with a custom **Takagi-Sugeno fuzzy-inference engine** to rank retrieval candidates by size, availability, and speed
- Automated media metadata tagging and library organization using **Beets** and a custom Python sorting script, replacing manual file curation

Interactive Portfolio & Web Showcase | React, JavaScript, Vercel, Git

September 2026

- Architected and deployed a responsive personal portfolio using **React**, delivering an interactive UI with modular components to showcase architecture diagrams and technical benchmarks
- Configured continuous deployment via **Vercel** with automated GitHub CI integration, ensuring fast global edge delivery and zero-downtime updates

Electric-Call Patch Prioritizer (UTEP Hackathon 2025) | Python

October 2025

- Built a weighted scoring algorithm ranking **1,000+** network devices by load, dependency, and criticality for a patch prioritization tool delivered to El Paso Electric, preprocessing input datasets with a **4-person** team

LEADERSHIP & INVOLVEMENT

Technical Lead

ColorStack Student Chapter

April 2026 – Present

El Paso, TX

- Organized and led **10** hands-on technical workshops on Python, NumPy, Pandas, and applied machine learning/LLM fundamentals, consistently reaching **30+** computing students per session

Mentee

Google Developer Student Club (GDG)

August 2025 – December 2025

El Paso, TX

- Selected as **1 of 50** mentees for the Fall 2025 cohort through a competitive application process
